

# MOUNT TRiO

WINES OF  
THE GREAT SOUTHERN  
WESTERN AUSTRALIA

## 2008 TEMPRANILLO

This is our second release of Tempranillo, the fantastic Spanish variety traditionally grown in the Rioja region of northern Spain. Typically, Tempranillo has great colour and attractive savoury fruit flavours.

This is a variety well suited to the warm and dry growing conditions in many parts of Western Australia and we harvested this fruit in early April from a vineyard in the Geographe region of WA.

### AROMA

This '08 Tempranillo has a deliciously fruity aroma with some earthy but sweet, smoky plum fruit characters.

### PALATE

This has loads of fresh fruit flavours on the palate. It has some lovely drying tannins to balance the generous 'dusty plum' fruit characters and it has a well flavoured and lingering finish.

### CELLARING

The Tempranillo is best enjoyed as a relatively young wine while the fruit flavours are still vibrant.

It is a fantastic food wine so serve with wood fired pizza or your favourite tapas. Enjoy now and over the next one - two years.
